INTRODUCTION:

CARBECHO.COM is a car buying and selling website. Where a user can buy a brand new or used car and can sell his old car. In this website we provide the facilities to view and compare the actual condition of user card with another cars. We do provide filters of Car Model, Manufactured year, Colour etc. If a user wants to have details of his dream car, he/she can reachout our CARINFO page to know sufficient about specifications.

OBJECTIVE OF THE PROJECT : To solve the listed problems

- We all are living in a world where a family have separate cars for each member. So by the time he/she turned 18, they started looking for their dream car. So in order to provide complete deatils of car we made this website.
- There are people who want to be in trend, so what they do is find a customer for their used car and buy a brand new. So here we offer a platform for those people to sell their car by adding sufficient and required details of their used car.
- Acc. To reports, In India every day total number of car sale is about 8500. So everyday 8500 families searching for cars to buy. To solve the problem of looking about particular car and then buy in showroom, here we provide a facility to compare the cars and then decide and then buy.
